INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital by investing primarily in the common stocks of companies located (or with primary operations) in Africa and the Middle East.

Favor companies with attractive valuations and earnings that are growing faster than their local, regional, or global peers.

Securities are chosen based on bottom-up research, supported by a top-down perspective.

A focused portfolio leading to high-conviction decision-making.

Country allocation is driven by stock selection.

BENEFITS AND RISKS

Broad investment opportunity, offering exposure to a dynamic region.

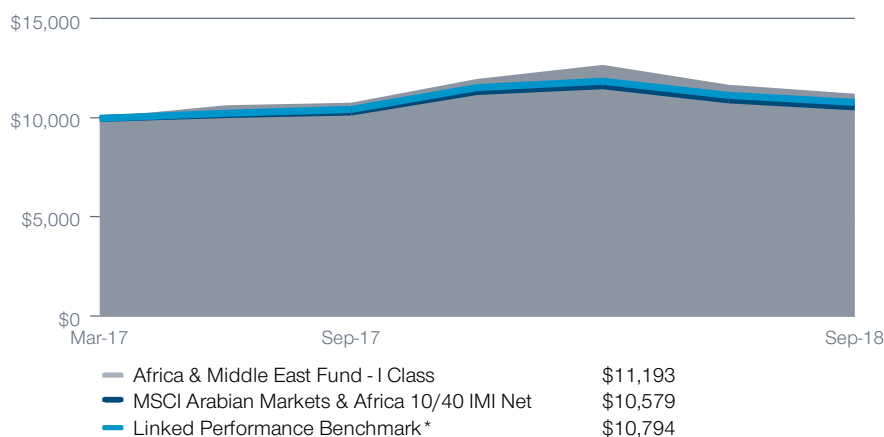

Over long periods, emerging markets investing offers diversification benefits relative to an all-U.S. portfolio.

Emerging markets investments are subject to the risk of abrupt and severe price fluctuations.

Investing internationally involves special risks including economic and political uncertainty and currency fluctuation.

CUMULATIVE RETURNS

Growth of \$10,000

Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please contact a T. Rowe Price representative at 1-855-405-6488. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (3/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

Effective July 1, 2018, the "net version of the benchmark replaced the "gross" version of the benchmark. The "net" version of the benchmark assumes the reinvestment of dividends after the deduction of withholding taxes.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.
