Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please visit our website or contact a T. Rowe Price representative at 1-855-405-6488. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

Effective July 1, 2018, the "net version of the benchmark replaced the "gross" version of the benchmark. The "net" version of the benchmark assumes the reinvestment of dividends after the deduction of withholding taxes.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital.

Invests at least 80% of its net assets (including any borrowings for investment purposes) in stocks issued by companies that are located in, or that have economic ties to, Asia (excluding Japan). The fund may purchase stocks issued by companies of any size, but typically focuses its investments on large-and mid-cap stocks.

BENEFITS AND RISKS

This fund pursues long-term growth by seeking to invest in well-managed Asian companies primarily located in countries in regions that are generally in an earlier stage of development than more developed economies, thus, they could provide greater long-term growth potential than developed markets.

The fund is "nondiversified", meaning it may invest a greater portion of assets in a single company and own more of the company's voting securities than is permissible for a "diversified" fund. Further, the fund's relatively limited geographic orientation and exposure to emerging markets increase its risk level. The fund price is subject to market risk in addition to risks associated with unfavorable currency exchange rates and political or economic uncertainty abroad.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

Additional Disclosures

T. Rowe Price uses the MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting. Each year, MSCI and S&P review the GICS structure. The last change occurred on September 28, 2018. **The information above currently utilizes the GICS structure in place prior to the recent change on September 28, 2018, and will be updated upon the next reporting cycle.** T. Rowe Price will adhere to all future updates to GICS for prospective reporting.

Morningstar rated the fund 5 stars among 73 Pacific/Asia ex-Japan Stk funds for the 3-year period (as applicable) ending 9/30/2018, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
