*The fund's net expense ratio reflects a permanent waiver of a portion of the T. Rowe Price Associates, Inc. management fee charged to the fund. This waiver is an amount sufficient to fully offset any acquired fund fees and expenses related to investments in other T. Rowe Price mutual funds. T. Rowe Price funds would be required to seek regulatory approval in order to terminate this arrangement. Figure is equivalent to the annual Operating Expense ratio.

†Portfolio Turnover represents 1 year period ending 12/31/17.

Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please contact a T. Rowe Price representative at 1-855-405-6488. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (12/17/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide capital growth, current income, and preservation of capital through a portfolio of stocks and fixed income securities.

Invests approximately 65% of total assets in U.S. and foreign common stocks and 35% in fixed-income securities.

At least 25% of total assets will be invested in fixed-income senior securities.

BENEFITS AND RISKS

Offers a way to balance the potential capital appreciation of common stocks with the income and relative stability of bonds over the long term.

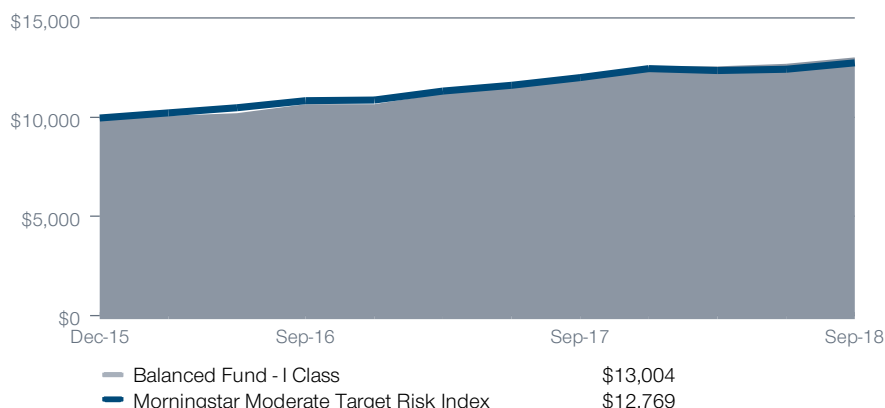

Stock prices can fall because of weakness in the broad market, a particular industry, or specific holdings.

Bonds may decline due to rising interest rates, a credit rating downgrade, or failure of the issuer to make timely payments of interest or principal.

Foreign investments are subject to risks, including adverse political and economic developments overseas, greater volatility, less liquidity, and the possibility that foreign currencies will decline against the dollar.

CUMULATIVE RETURNS

Growth of \$10,000
