Redemption Fee	-
Portfolio Holdings Turnover†	59.5%
Total Assets (all share classes)	\$834,264,329
Percent of Portfolio in Cash	1.0%
Beta	-

* Figure is equivalent to the annual Operating Expense ratio.

† Portfolio Turnover represents 1 year period ending 12/31/17.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide high income and some capital growth.

Invests primarily in corporate debt securities issued by U.S. and foreign companies.

Holdings will be a mix of long-term investment-grade and non-investment-grade bonds (also called high-yield or junk bonds.)

May invest in a variety of other securities in an effort to enhance income and achieve some capital growth.

Expect the weighted average maturity to exceed 10 years.

BENEFITS AND RISKS

Pursues high current income with some capital appreciation.

Emphasis on long-term investment-grade and non-investment-grade corporate bonds should offer higher income than what is available from U.S. Treasury securities although with greater risk of loss.

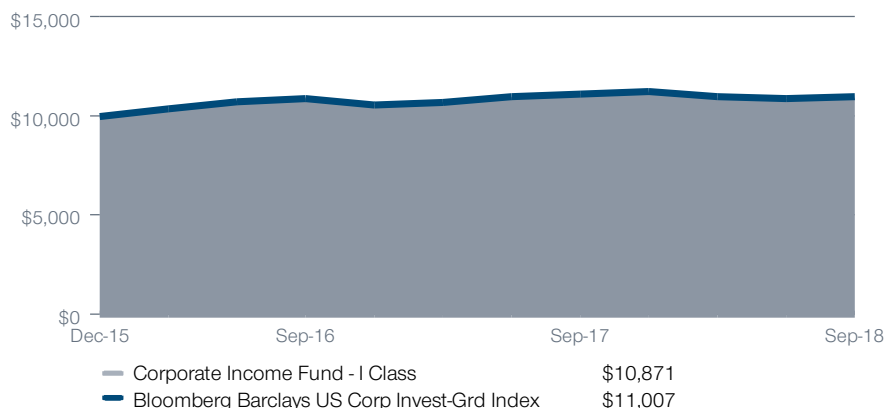

High-yield bonds, convertibles, and foreign securities provide the opportunity for capital growth and higher income but with greater risk.

Yield and share price will vary with interest rate changes.

If interest rates rise significantly from current levels, bond fund total returns will decline and may even turn negative in the short term.

CUMULATIVE RETURNS

Growth of \$10,000

PERFORMANCE

(NAV, total return)

	Three Months	Year-to-Date	One Year	Annualized				30-Day SEC Yield
				Three Years	Five Years	Ten Years	Fifteen Years	
Corporate Income Fund - I Class	0.46%	-2.99%	-1.97%	2.77%	3.42%	6.19%	4.86%	3.94%
Bloomberg Barclays U.S. Corporate Investment Grade Bond Index	0.97	-2.33	-1.19	3.12	3.54	6.35	4.69	-

Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please contact a T. Rowe Price representative at 1-855-405-6488. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (12/17/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

The Top Issuers excludes U.S. Treasuries, institutional funds, agencies and securitized products.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Credit Quality Ratings are obtained using Bloomberg Barclays methodology using ratings derived from Moody's Investors Service (Moody's), Standard & Poor's (S&P) and Fitch Ratings (Fitch). When ratings from all three agencies are available, the median rating is used. When ratings are available from two of the agencies, the lower rating is used. When one rating is available, that rating is used. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps. Unrated securities totaled less than 1% of the portfolio at the end of the reporting period.

Source for Maturity Diversification: T Rowe Price.

"Other" includes any categories not explicitly mentioned.
