Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please visit our website or contact a T. Rowe Price representative at 1-855-405-6488. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Effective July 1, 2018, the "net version of the benchmark replaced the "gross" version of the benchmark. The "net" version of the benchmark assumes the reinvestment of dividends after the deduction of withholding taxes.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital through investments primarily in the common stocks of companies located (or with primary operations) in the emerging market countries of Europe.

Favor companies with attractive valuations and earnings that are growing faster than their local and regional peers.

Identify themes/trends and industries that are likely to experience high future growth.

Securities are chosen based on bottom-up research supported by a top-down perspective.

Country allocation is driven by stock selection.

BENEFITS AND RISKS

Broad investment opportunity offering exposure to a rapidly evolving region.

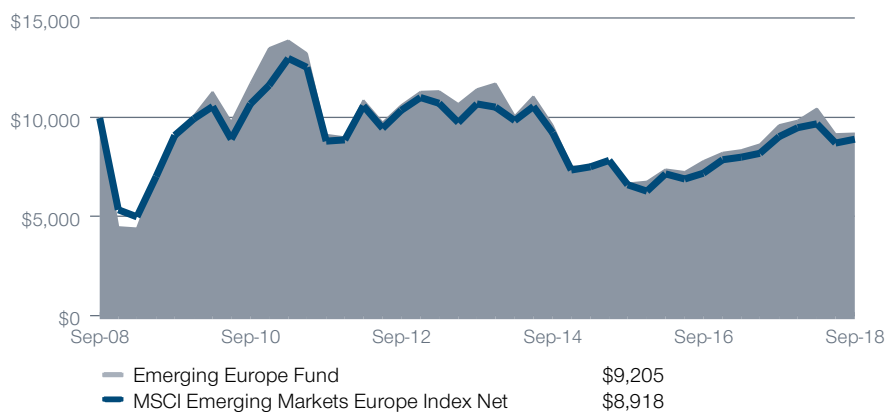

Over long periods, investing in emerging markets offers diversification benefits relative to an all-U.S. portfolio.

Investments in emerging markets are subject to the risk of abrupt and severe price declines. The economic and political structures of developing nations often do not compare favorably with developed countries in terms of wealth and stability, and their financial markets are not as liquid.

Investing internationally involves special risks, including economic and political uncertainty and currency fluctuation.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.
