## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks a high level of dividend income and long-term capital growth primarily through investments in stocks.

Employ a value-oriented investment approach.

Focus on companies with an above-average dividend yield—always a positive component of total return.

Utilize a thorough “bottom-up” fundamental research evaluation of each holding.

Broadly diversify sector exposure to minimize volatility.

## BENEFITS AND RISKS

Focus on above-average yielding value stocks:

- Provide a relatively steady source of return
- Can enhance return potential over time through reinvesting and compounding
- Reduce fund volatility

By investing in common stocks, the fund is subject to declines in stock prices.

The value approach carries the risk that the market may not realize a security's value for a long time, or that a stock judged to be undervalued is actually appropriately priced.

## CUMULATIVE RETURNS

Growth of \$10,000

**Current performance may be lower or higher than the quoted past performance, which is not a reliable indicator of future performance. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. To obtain the most recent month-end performance, please call 1-855-405-6488 or visit [troweprice.com](http://troweprice.com). Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit [troweprice.com](http://troweprice.com). Read it carefully.** The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the “investor class”). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (12/17/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

## Additional Disclosures

Morningstar rated the fund 4 stars among 1,096 Large Value funds for the 3-year period (as applicable) ending 3/31/2019, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
