INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital through investments primarily in the common stocks of companies located (or with primary operations) in Europe.

Invest in firms with quality management, strength of franchise, reasonable valuation, and strong cash flows.

Normally, at least five countries will be represented in the portfolio.

- Primary emphasis: Austria, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Expect to make substantially all of its investments in stocks of companies located in the countries listed above, as well as others as their markets develop.

BENEFITS AND RISKS

Broader investment opportunity—the world's best companies are not only in the United States.

Over long periods, international investing offers diversification benefits relative to an all-U.S. portfolio.

Investing internationally involves special risks, including economic and political uncertainty and currency fluctuation.
