INVESTMENT OBJECTIVE AND STRATEGY

This fund seeks to provide, consistent with prudent portfolio management, the highest level of income exempt from federal and Georgia state income taxes by investing primarily in investment-grade Georgia municipal bonds.

Invests at least 80% of net assets in Georgia municipal bonds.

Weighted average maturity is expected to exceed 10 years.

BENEFITS AND RISKS

Offering Georgia investors double-tax-free income. Some income may be subject to the federal alternative minimum tax.

Invests primarily in municipal bonds with longer maturities, so it generally provides higher yields than short-term or money market tax-free funds, but with greater price volatility.

Yield and share price will vary with changes in interest rates.

If interest rates rise significantly from current levels, bond fund total returns will decline and may even turn negative in the short term. There is also a chance that some of the fund's holdings may have their credit rating downgraded or may default.

The fund is less diversified than one investing nationally.

Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please contact a T. Rowe Price representative at 1-855-405-6488. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (7/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

^oExcludes the effect of contractual expense limitation arrangements.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Source for credit quality: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. Prerefunded securities are rated based on their current prerefunded status, regardless of which nationally recognized statistical rating organization provided the original rating. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps.
