Total Assets (all share classes)	\$1,605,485,482
Percent of Portfolio in Cash	0.7%
Beta	-

†Portfolio Turnover represents 1 year period ending 12/31/18.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital through investments primarily in the common stocks of established companies throughout the world, including the U.S.

Invest in a variety of industries in developed and, to a lesser extent, emerging markets.

Invest in firms taking market share in the global economy and demonstrating strong free cash flow, sustainable margins, long product cycles, and experienced management teams.

The percentage of assets invested in U.S. and foreign stocks will normally be at least 80% of net assets and will vary over time according to the manager's outlook.

BENEFITS AND RISKS

Broader investment opportunity—some of the world's best companies are not only in the United States.

Over long periods, international investing offers diversification benefits relative to an all-U.S. portfolio.

Share prices are subject to the risks associated with unfavorable currency exchange rates and political or economic uncertainty abroad.

CUMULATIVE RETURNS

Growth of \$10,000

PERFORMANCE

(NAV, total return)

	Three Months	One Year	Annualized			
			Three Years	Five Years	Ten Years	Fifteen Years
Global Stock Fund - I Class	17.93%	7.76%	18.12%	12.29%	15.50%	9.27%
MSCI All Country World Index Net	12.18	2.60	10.67	6.45	11.98	6.80

Current performance may be lower or higher than the quoted past performance, which is not a reliable indicator of future performance. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. To obtain the most recent month-end performance, please call 1-855-405-6488 or visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit troweprice.com. Read it carefully. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (3/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.
