FACT SHEET
Dynamic Global Bond Fund - I Class
As of June 30, 2019

INVESTMENT OBJECTIVE AND STRATEGY
The fund seeks high current income.
- The fund will normally invest at least 80% of its assets in bonds, with at least 40% its net assets in foreign securities including securities of emerging markets issuers.
- The fund limits its overall foreign currency exposure to 50% of its net assets.
- The fund may hold up to 30% in high yield bonds ("junk bonds") and other holdings that are rated below investment grade.

BENEFITS AND RISKS
- The Fund seeks to generate consistent performance by exploiting inefficiencies in the full universe of the global fixed-income and currency markets.
- The Fund is subject to the risk that rising interest rates will cause bond prices to fall. The fund is "nondiversified" so its share price can be expected to fluctuate more than that of a "diversified" fund.
- Investments in foreign bonds are subject to special risks, including potentially adverse overseas political and economic developments, greater volatility, lower liquidity, and the possibility that foreign currencies will decline against the dollar.
- The fund’s use of derivatives may expose it to additional volatility in comparison to investing directly in bonds and other debt securities.

Portfolio Manager:
Arif Husain
Managed Fund Since: 2015
Joined Firm: 2013

FUND INFORMATION
Symbol: RPEIX
CUSIP: 77956H468
Inception Date of Fund: August 28, 2015
Benchmark: 3 Month LIBOR in USD

Fiscal Year End: December 31
Total Annual Operating Expenses per $1,000: $5.20
12B-1 Fee: –
Portfolio Holdings Turnover†: 166.0%
Total Assets (all share classes): $4,287,876,088
Percent of Portfolio in Cash: 14.8%
Beta: -5.43

†Portfolio Turnover represents 1 year period ending 12/31/18.

CUMULATIVE RETURNS
Growth of $10,000

PERFORMANCE
(NAV, total return)

| Dynamic Global Bond Fund - I Class | 1.31% | 0.41% | 1.68% | 0.55% | 1.86% | 2.99% |
| 3 Month LIBOR in USD | 0.63 | 1.30 | 2.58 | 1.79 | 1.34 | – |

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit troweprice.com. Read it carefully. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the “investor class”). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (8/28/15) and then actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

Additional Disclosures

Morningstar rated the fund 1 stars among 270 Nontraditional Bond funds for the 3-year period (as applicable) ending 6/30/2019, respectively. The Morningstar Rating™ for funds, or “star rating”, is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. Unless otherwise noted, returns are shown with gross dividends reinvested.

T. Rowe Price uses a custom structure for diversification reporting on this product. Diversification exhibits may not add to 100% due to exclusion or inclusion of cash. Sources for credit quality: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps. Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.
