## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks high current income and, secondarily, capital appreciation.

Identify issues with above-average yields and the potential for capital appreciation.

Conduct rigorous credit analysis to determine:

- Ability for issuer to pay debt on a timely basis
- Likelihood an issue will be upgraded to investment grade

Typically hold hundreds of individual issues to reduce the impact of a single issue on fund performance.

## BENEFITS AND RISKS

Significantly greater income potential than Treasury securities or investment-grade bonds in exchange for greater risk.

Effective portfolio diversification.

Three forms of risk may impact high-yield bonds:

- Credit risk (high-yield bonds carry a greater default risk than higher-rated bonds)
- Interest rate risk
- Liquidity risk

## CUMULATIVE RETURNS

Growth of \$10,000

**Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please contact a T. Rowe Price representative at 1-855-405-6488.** The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (8/28/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Effective April 1, 2016, Credit Suisse changed its methodology for calculating the performance of the Credit Suisse High Yield Index. The data in the table reflects the performance of the index using the new methodology.

## MORNINGSTAR™

Overall Morningstar Rating™  
 Morningstar Category™ High Yield Bond  
 Rated against 592 High Yield Bond funds, as of 9/30/2018, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics.

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

## Additional Disclosures

Morningstar rated the fund 4 stars among 592 High Yield Bond funds for the 3-year period (as applicable) ending 9/30/2018, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Sources for credit quality: Moody's Investors Service and Standard & Poor's (S&P); split ratings (e.g., BB/B and B/CCC) are assigned when the Moody's and S&P ratings differ. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps. All short-term holdings, regardless of ratings, are included with the cash positions.
