Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please contact a T. Rowe Price representative at 1-855-405-6488. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (8/28/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital appreciation by investing primarily in mid-sized companies that appear to be undervalued.

The fund will invest at least 80% of its net assets in companies whose market capitalization falls within the range of companies in the S&P MidCap 400 Index or the Russell Midcap Value Index.

The fund focuses on companies with the following:

- Attractive operating margins
- Sound balance sheet and financial management
- Stock ownership by management

BENEFITS AND RISKS

Mid-cap companies may be more responsive and better able to adapt to the changing needs of their markets than large companies.

Medium-sized companies tend to have greater resources and, therefore, represent less risk than small companies.

The stocks of mid-cap companies entail greater risk and are usually more volatile than the shares of large companies.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

Additional Disclosures

T. Rowe Price uses the MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting. Each year, MSCI and S&P review the GICS structure. The last change occurred on September 28, 2018. **The information above currently utilizes the GICS structure in place prior to the recent change on September 28, 2018, and will be updated upon the next reporting cycle.** T. Rowe Price will adhere to all future updates to GICS for prospective reporting.

Morningstar rated the fund 4 stars among 373 Mid-Cap Value funds for the 3-year period (as applicable) ending 9/30/2018, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
