INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital growth by investing primarily in the common stocks of growth companies.

Invest primarily in common stocks of U.S. companies in sectors of the economy that are the fastest growing or have the greatest growth potential.

Stock selection based on companies with the following:

- Earnings growth rates which exceed that of the average company in the S&P 500 Index
- Favorable company fundamentals
- Effective management
- Reasonable stock valuations

BENEFITS AND RISKS

Potential for significant, long-term growth of capital by seeking to participate in the growth of companies positioned to benefit from the dynamic technological, social, medical, economic, and business developments that are defining the "new America".

The fund may entail above-average risk since growth companies pay few dividends and are typically more volatile than slower-growing companies with high dividends.
