## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks a high level of income exempt from federal income taxes.

Invests at least 80% of its total assets in investment-grade bonds rated from AAA to BBB by at least one national rating agency or rated the equivalent by T. Rowe Price if other ratings are not available.

May invest up to 20% of the fund's total assets in non-investment-grade bonds.

May buy securities of any maturity, and the weighted average maturity is expected to exceed 15 years but may be less when, in the judgment of the portfolio manager, a shorter weighted average maturity is in the best interest of the fund.

## BENEFITS AND RISKS

Income level should generally be above that of money market and short- and intermediate-term bond funds, but its share price will fluctuate more.

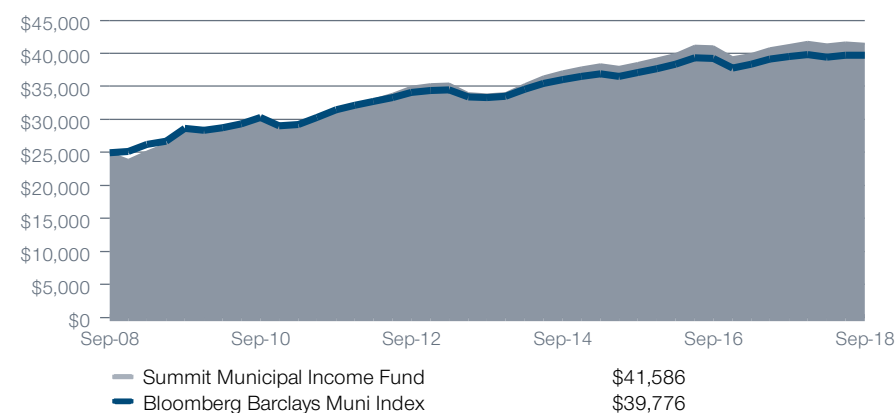

By focusing on investment-grade securities, credit risk should be reduced. Income dividends should be exempt from federal income taxes, and your state may not tax that portion of each fund's income earned on the state's own obligations (if any).

Lower expenses enable the funds to pay higher dividends.

Subject to the usual risks of fixed-income investing, including interest rate risk, credit risk, and political risk.

## CUMULATIVE RETURNS

Growth of \$25,000
