INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks a high level of income consistent with minimal fluctuation in principal value and liquidity.

Invest in a diversified portfolio of short- and intermediate-term investment-grade corporate, government, and mortgage-backed securities.

May also invest in bank obligations, collateralized mortgage obligations, foreign securities, and hybrids.

Normally, the fund will invest at least 80% of its net assets in bonds.

The fund's average effective maturity will not exceed three years.

BENEFITS AND RISKS

The fund's income level should generally be above that of a money market fund but less than that of a long-term bond fund.

The fund's share price should fluctuate less than a longer-term bond fund.

Unlike money market funds, which are managed to maintain a stable share price, the fund's price can decline.

Yield and share prices will vary with interest rate changes.

**U.S. government agency securities are issued or guaranteed by a U.S. government agency, and may include conventional pass-through securities and collateralized mortgage obligations; unlike Treasuries, government agency securities are not issued directly by the U.S. government and are generally unrated but may have credit support from the U.S. Treasury (e.g., FHLMC and FNMA issues) or a direct government guarantee (e.g., GNMA issues). Therefore, this category may include rated and unrated securities.

Usually, higher betas represent riskier investments.

Additional Disclosures

Morningstar rated the fund 3, 3, and 3 stars among 474, 400 and 260 Short-Term Bond funds for the 3-, 5-, and 10-year periods (as applicable) ending 9/30/2018, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Sources for credit quality: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps.
