INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks a level of income that is consistent with the current rate of inflation.

Invest in a diversified portfolio of short- and intermediate-term investment-grade inflation-linked, corporate, government, mortgage-backed, and asset-backed securities.

May also invest in money market securities, bank obligations, collateralized mortgage obligations, and foreign securities.

Invest at least 80% of net assets in bonds and at least 20% of net assets in inflation-linked securities.

The fund's average effective maturity will range between 1-7 years.

BENEFITS AND RISKS

The fund may overweight investments in securities indexed to inflation during periods of high or rising inflation, and overweight investments in securities not indexed to inflation during periods of low or falling inflation.

Yield and share price will vary with interest rate changes and the level of real yields may be negative. Deflationary conditions could cause the fund's principal and income to decline in value.

The fund's use of derivatives may expose it to additional volatility in comparison to investing directly in bonds and other debt securities.

Current performance may be lower or higher than the quoted past performance, which is not a reliable indicator of future performance. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. To obtain the most recent month-end performance, please call 1-855-405-6488 or visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit troweprice.com. Read it carefully. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details. Yields have not been adjusted for inflation. Because inflation fluctuates, it cannot be projected into the future precisely enough to be included in the yield calculation.

[°]Excludes the effect of contractual expense limitation arrangements.

MORNINGSTAR™

Overall Morningstar Rating™

Morningstar Category™ Inflation-Protected Bond

Rated against 200 Inflation-Protected Bond funds, as of 3/31/2019, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

Additional Disclosures

Morningstar rated the fund 2, 2, and 1 stars among 200, 170 and 105 Inflation-Protected Bond funds for the 3-, 5-, and 10-year periods (as applicable) ending 3/31/2019, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Sources for credit quality: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps.
