† Portfolio Turnover represents fiscal year to date of the report.

PERFORMANCE

(NAV, total return)

	Three Months	Year-to-Date	One Year	Annualized			30-Day SEC Yield	30-Day SEC Yield w/o Waiver [°]
				Three Years	Five Years	Since Inception 12/3/12		
Ultra Short-Term Bond Fund - I Class	0.84%	1.73%	2.17%	1.80%	1.26%	1.12%	2.59%	2.60%
Bloomberg Barclays Short-Term Government/Corporate Index	0.53	1.35	1.59	1.04	0.72	0.66	-	-

Current performance may be higher or lower than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. The performance information shown does not reflect the deduction of any redemption fee; if it did, the performance would be lower. To obtain the most recent month-end performance, or to request a prospectus or summary prospectus, which includes investment objectives, risks, fees, expenses, and other information that you should read and consider carefully before investing, please contact a T. Rowe Price representative at 1-855-405-6488. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (7/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions.

[°]Excludes the effect of contractual expense limitation arrangements.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks a high level of income consistent with minimal fluctuations in principal value and liquidity.

Invests in a diversified portfolio of shorter-term investment-grade corporate and government securities, asset-backed securities, and bank obligations.

Normally, the fund will invest at least 80% of its net assets in bonds, and all of the securities purchased by the fund will be rated investment-grade at the time of purchase.

While the fund may purchase an individual security with a maturity of up to 5 years, under normal conditions the fund's dollar-weighted average effective maturity will be 1.5 years or less.

BENEFITS AND RISKS

The fund's income should be above that of a money market fund, with only minimal share price fluctuation.

Due to the nature of the fund's investment universe, the fund will take on incrementally more credit risk than a money market fund.

Additionally, this fund is subject to interest rate risk, as a rise in interest rates may cause the price of its securities to fall. However, share price fluctuation should be substantially less than that found in long term bond strategies.

CUMULATIVE RETURNS

Growth of \$10,000

— Ultra Short-Term Bond Fund - I Class \$10,259
— Bloomberg Barclays Short-Term Gov/Corp Index \$10,190

*U.S. Treasury securities are issued by the U.S. Treasury and are backed by the full faith and credit of the U.S. government. The ratings of U.S. Treasury securities are derived from the ratings on the U.S. government.

**U.S. government agency securities are issued or guaranteed by a U.S. government agency, and may include conventional pass-through securities and collateralized mortgage obligations; unlike Treasuries, government agency securities are not issued directly by the U.S. government and are generally unrated but may have credit support from the U.S. Treasury (e.g., FHLMC and FNMA issues) or a direct government guarantee (e.g., GNMA issues). Therefore, this category may include rated and unrated securities.

MATURITY DIVERSIFICATION

Ultra Short-Term Bond Fund - I Class	29.1%	61.3%	9.4%	0.1%	0.1%	0.0%	0.0%	0.0%

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments.

The Top Issuers excludes U.S. Treasuries, institutional funds, agencies and securitized products.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Sources for credit quality: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps.

Source for Maturity Diversification: T Rowe Price.
